Land-grant college engineering association.

Founded January 1913 as Land-grant college engineering organization, the executive committee being authorized to "take proper steps looking towards organic relations with the Association of American agricultural colleges and experiment stations"; a constitution was adopted at a meeting held in November, 1913, under the name Land-grant college engineering association.
In August 1915 the Section on college work and administration of the Association of American agricultural colleges and experiment stations voted to create a division of the section to be known as the Division of engineering; the Land-grant college engineering association therefore became the Division of engineering though retaining its own name until 1919.

(Continued on next card)

Land-grant college engineering association. (Card 2)

In November 1919 there was a reorganization of the general association, the name Association of American agricultural colleges and experiment colleges being changed to Association of land-grant colleges, and the Division of engineering of the Section of college work and administration becoming a separate section under the name of Section of engineering.
In November 1926 the name of the general association was again changed from Association of land-grant colleges to Association of land-grant colleges and universities, but the Section of engineering remained unchanged.
